DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required

under 35 U.S.C. 121:

- I. Claims 1-6 and 35-37 are, drawn to compounds, composition and process of preparing, classified in class 560, 564, in various subclasses.
- II. Claims 7-8 are, drawn to processes, classified in class 560, 564, in various subclasses.
- III. Claims 9-12 are, drawn to processes, classified in class 560, 564, in various subclasses.
- IV. Claim 13 is, drawn to a process, classified in class 560, in various subclasses.
- V. Claims 14-15 are, drawn to processes, classified in class 564, in various subclasses.

Art Unit: 1626

VI. Claim 16 is, drawn to a process, classified in class 564, in various subclasses.

VII. Claims 17-19 are, drawn to methods, classified in class 514, in various subclasses.

VIII. Claims 20-34 are, drawn to methods, classified in class 514, in various subclasses.

IX. Claims 38-50 are, drawn to methods, classified in class 514, in various subclasses.

2. The inventions are distinct, each from the other because of the following reasons: the inventions of Groups I-IX are independent and distinct because there is no patentable co-action among the various Groups and a reference anticipating one member will not make another obvious.

The inventions of Groups II-VI are distinct as each process involves different reactants' and/or different process steps.

Inventions of Groups I, and VII-IX are drawn to compounds, compositions, processes and methods of use. These are materially different from one another and thus distinct. Moreover, the processes of Groups II-VI may

Art Unit: 1626

utilize more than one reactant indicating that the processes are not reactant specific dependent. Additionally, the processes as claimed can be used to make a different product such as shown in U.S. Patent No. 4,024,274.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: esters, amines, carboxamines, nitriles etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, esters, nitriles, amines etc., are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all

Art Unit: 1626

claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Eric W. Adcock on 9/26/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to E. Sackey whose telephone number is (703) 305-6889. The examiner can normally be reached on Monday-Friday from 7:30 a.m. to 4:30 p.m.

Art Unit: 1626

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane, can be reached on (703) 308-4537. The fax phone number for this Group is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
